HOW TO USE WITH YOUR CUTTING MACHINE & DESIGN SOFTWARE

Cricut Design Space

1. Upload Vector Cut Path: Choose **_cricut_cutfile.svg** for clean vector cutting with smooth curves and zero extra nodes.

2. Print Then Cut Stickers: Upload **_sticker_white_border_300dpi.png**. Cricut automatically recognizes the solid white offset contour.

3. Zero Bleed Issues: The 35px white margin ensures precision cutting without shaving off character artwork.

Silhouette Studio

1. Basic (Free) Edition: Open **_silhouette_cutfile.dxf**. Native closed LWPOLYLINE lines are ready to cut immediately.

2. Designer Edition: Directly import the **_cricut_cutfile.svg** file for full vector manipulation.

3. Cut Settings: Set action to 'Cut' with standard settings (Blade 2-3, Force 14) for vinyl sticker paper or printable sheets.

Photoshop, GIMP & Canva

1. Native Multi-Layer PSD: Open **_multilayer.psd** to access independent named layers with intact alpha transparency.

2. Zero Black Box Preview: Pre-compiled composite RGB image data guarantees instant preview in LibreOffice and Finder.

3. Canva Drag & Drop: Upload the **_transparent_300dpi.png** files directly for rapid drag-and-drop design.

Digital Planners & GoodNotes

1. Digital Stickers: Insert **_sticker_white_border_300dpi.png** into GoodNotes, Notability, or Noteshelf.

2. Pre-Cropped & Clean: True transparent backgrounds with crisp white sticker outlines for aesthetic digital planning.

3. 300 DPI Ultra-HD: Native 3600×3600 px resolution allows infinite zooming without blur on high-res iPad retina screens.
